PERSONAL PROJECTS

Personal Diary (10/2022 - 11/2022)

- Built a secure console application for user account management and diary entries. Features include account creation, login, diary insertion and reading, password reset via OTP, and admin access for data management. Utilized native file system for secure data storage.
- <https://github.com/DivyanshUpadhyay/Personal-Diary> 🔗

Tax Management System (12/2022 - 01/2023)

- A console based application in which users can be create , login , Check CTC and Tax. And Admin can access all the information , change the passwords and print the details. All Data is stored in the system using native file system but created in secured location.
- <https://github.com/DivyanshUpadhyay/Tax-Management>. 🔗

Edit-Ease react app (08/2023 - 08/2023)

- Developed a React web application for text editing, featuring essential functionalities like text capitalization, lowercase conversion, and extra space removal, with added clipboard copying capability. Incorporated user-friendly dark mode and light mode options for improved usability.
- <https://ease-edit.netlify.app>. 🔗

Majestic Journey (10/2023 - 05/2024)

- Designed and developed a booking platform for hotels and tours with user and admin interfaces. As the frontend developer, I ensured a visually appealing and user-friendly experience using the MERN stack (MongoDB, Express.js, React, Node.js). Features include user authentication, real-time booking, payment integration, and an admin dashboard for managing bookings and updates.
- My role is Frontend Developer in this project.

ORGANIZATIONS

Organizer (Freshers)

As the Freshers event Organizer at I.T.S Engineering College, I led logistics and schedules, creating a memorable welcome for new students. Strengthened organizational and communication skills while enhancing the college community.

Core Team Member & Vlogging Team Head

As Core Team Member and Vlogging Team Head for the Annual Day Function at I.T.S Engineering College, I led a team in capturing and producing high-quality event videos, refining my leadership and project management skills.

EVENT HEAD

As Event Head for the Annual Day Function at I.T.S Engineering College, I organized the entire event with my team, overseeing all aspects from planning to execution. This role enhanced my leadership and project management skills.

EVENT HEAD

As Event Head for InnoCodeathon, a 24-hour hackathon at I.T.S Engineering College, I led the organization and execution of the event. This involved coordinating logistics, managing team activities, and ensuring a smooth experience for all participants, thereby honing my leadership and project management skills.
